Technical Documentation Archive

Welcome to the technical documentation hub. This site serves as a deep-dive repository for system architecture, networking, and cloud infrastructure projects.

For personal information, blog posts, and contact details, please visit my main website:

About this Wiki

This portal is organized into different technical projects. Each section contains configuration details, implementation steps, and architecture diagrams.

Note on Language: Most of the documentation here is written in **English** for global accessibility. However, specific projects (like the Local Networking project) are documented in **Basic German**, as they were implemented within a German-speaking infrastructure environment.

—

Active Projects

1. Project: Local Virtualization & Networking (DE)

Detailed documentation of an on-premise infrastructure.

- **Focus:** Proxmox VE, L2/L3 Managed Switches, Mini-Server Cluster.
- **Language:** Deutsch.
- Go to Project Page ->

2. Project: Public Cloud & Documentation Engine (EN)

Building a secure, cloud-based documentation system.

- **Focus:** Oracle Cloud (OCI), Cloudflare Security, Automated Backups.
- **Language:** English.
- Go to Project Page ->
